THE BUSINESS,

in one clear workspace.

A practical, self-hosted business platform for the work behind your company.

OPEN SOURCE · MODULAR · SELF-HOSTED

THE EVERYDAY CHALLENGE

Business work gets scattered

People lose time switching tools, repeating updates, and hunting for the latest context.

CUSTOMERS

Chats, contacts, follow-ups

MONEY

Invoices, expenses, approvals

PEOPLE

Schedules, projects, records

OPERATIONS

Stock, vendors, service

A

ONE SHARED WORKSPACE

See the context.

Find the next step.

Related work stays connected, visible, and easier to act on.

LESS FRAGMENTATION → MORE CLARITY

ONE PLATFORM, CONNECTED AREAS

The tools your team returns to

Move between customer work, money, people, and operations without losing the bigger picture.

1 **CRM**
Companies, contacts, deals

2 **FINANCE**
Invoices, expenses, budgets

3 **PEOPLE**
HR, payroll, schedules

4 **PROJECTS**
Tasks and delivery

5 **SERVICE**
Support desk and knowledge

6 **INVENTORY**
Products and stock

7 **VENDORS**
Purchasing and suppliers

8 **WORKFLOWS**
Rules and automation

ONE SET OF SHARED RECORDS

Connected context helps teams follow work from the first request to the next action.

SEE WHAT NEEDS ATTENTION

A dashboard built for momentum

Start with a high-level view, then open the records behind each item.

ONE VIEW

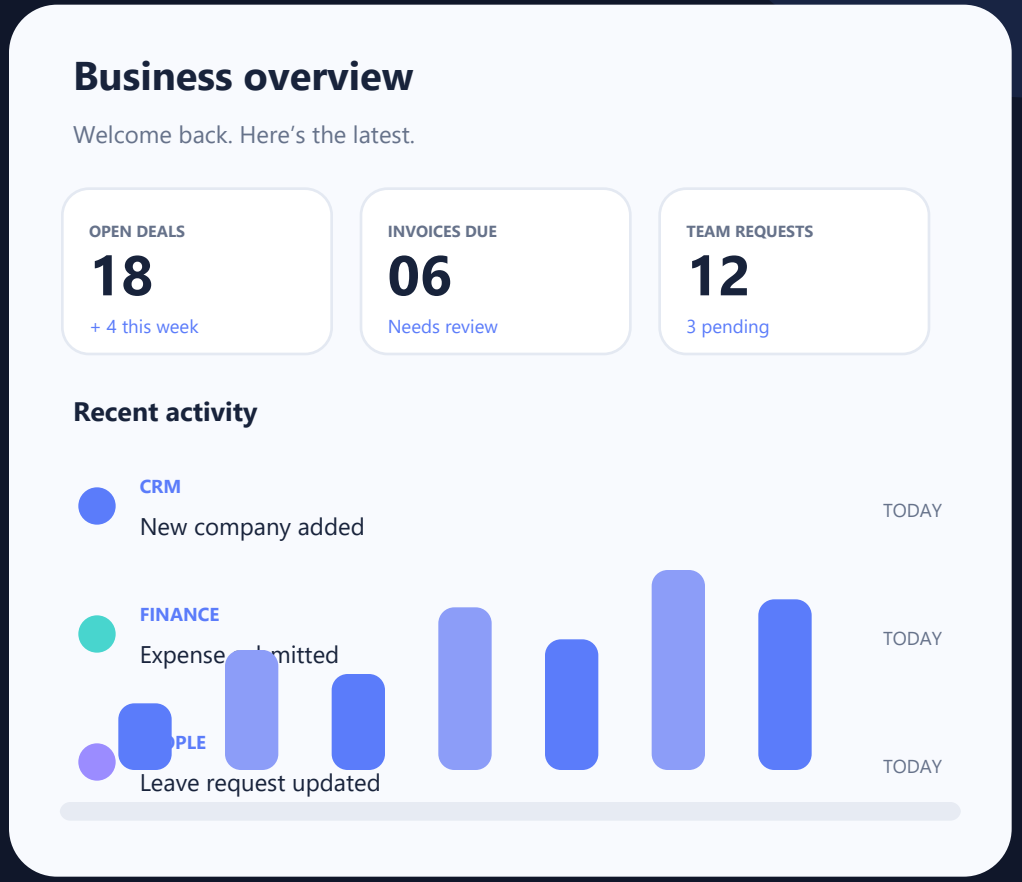

Key activity starts in one place.

USEFUL DETAIL

Follow a number to its source record.

A SIMPLE RHYTHM

Review what changed. Open the detail. Take the next step.

CRM

Know the people behind the work

Keep company and contact records, opportunities, and activity together.

NEW

Meet

QUALIFIED

Understand

IN PROGRESS

Work together

WON

Keep growing

A RELATIONSHIP, WITH CONTEXT

01 Capture

Create a company or contact record.

02 Connect

Link conversations, deals, and details.

03 Continue

See the history and decide what comes next.

A shared customer view helps a small team stay coordinated as relationships grow.

FROM REQUEST TO RESOLUTION

Keep everyday work moving

Focused work areas help teams handle the details and keep decisions visible.

MONEY

Invoices · Expenses · Budgets

PEOPLE

Team · Payroll · Time

SERVICE

Requests · Support · Knowledge

OPERATIONS

Inventory · Vendors · Purchasing

A CLEAR APPROVAL PATH

Requests and approvals give important work a visible next step.

FINANCE · PEOPLE · SERVICE · OPERATIONS

AUTOMATION + OPTIONAL AI

Spend less time on repeat steps

Use workflows for routine actions. Add AI assistance where it helps your team.

A SIMPLE WORKFLOW

WHEN
A record changes

→

CHECK
A rule matches

→

THEN
Take an action

Examples: send a notification, update a field, create a record, or call a webhook.

AI, when configured

Draft, summarize, and suggest next actions with an AI provider connected to your setup.

Human review stays in the loop.

Configure the provider for AI features.

AI FEATURES REQUIRE A CONFIGURED PROVIDER

MEET STRIDEWORKS FOOTWEAR

A demo company you can explore

Illustrative sample data shows how customer, product, and business work can connect.

CUSTOMERS

People and relationships

PRODUCTS

Catalog and stock

SALES

Orders and follow-ups

OPERATIONS

Vendors and delivery

DEMO DATA ONLY · NOT REAL CUSTOMER RECORDS

SELF-HOSTED BY DESIGN

Your deployment. Your operating choices.

A modular web application with an API, relational database, and supporting services.

ADMIN WEB

Next.js interface

The team's workspace

→

API

Node.js · Hono

Business endpoints

→

DATA

PostgreSQL · Redis

Records and supporting services

SELF-HOSTED

Deploy on infrastructure you operate; configure secrets, backups, and integrations for your environment.

AI capabilities and external integrations depend on provider credentials and the deployed configuration. Feature availability may vary by version.

START SMALL. MAKE IT YOURS.

Bring your business into focus.

A simple path from first launch to a workspace shaped around your team.

01

RUN

Start the stack with the project's Docker Compose setup.

02

EXPLORE

Open the admin app and navigate the key work areas.

03

LOAD DEMO

Use the StrideWorks sample to explore connected records.

04

CONFIGURE

Set real secrets, integrations, AI provider, and backups.

ARTHIX

One workspace for the work behind your business.

Explore. Connect. Grow.

For exact setup commands and configuration, follow the current repository README and environment example. Change demo credentials before exposing the deployment.
